

2/2 proportional valves for power steering pumps

Applications

- Use in power steering pump

Customer benefit

- Reduced power consumption of steering systems
- Reduced cooling effort in the system
- Improvement of steering comfort
- Adjustment of the steering force to the driving status

Features

- Normally-open/closed model
- High pressure
- Cartridge valve
- Bolted joint solution
- Coil separate

Technical data

2/2 proportional valves

Pressure drop/flow	7 l/min at 2 bar
Static opening pressure	-
Burst pressure	Mind. 300 bar
Resistance	5.5 ohms
Nominal voltage	12 V DC
Ambient temperature	-40 °C - 135 °C
Max. medium temperature	120 °C
Protection class	IP6K9K
