

Cartridge valves

Technical data

Cartridge valves

Voltages	12 V DC
Flow	5 - 9 l/min
Duty cycle	100 %
Pressure range	Max. 350 bar (dynamic compressive strength)
Tightness	Dependent on connector variant IP67 to IP6K9K

Applications

- Electromagnetically actuated hydraulic cartridge valves for electrohydraulic controls

Features

- Different connector variants such as DEUTSCH DT04-2P, AMP Junior Timer, customised connector possible upon request
- Switching and proportional models possible
- Usually customised designs
